Electrically Operated Valves

General Purpose

Kuhnke Power Valves

3/2 Solenoid Valves

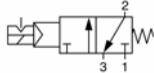

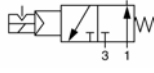

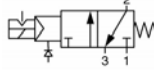

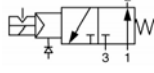

1/2 Ported

1/4 Ported

3/2 poppet design valves are solenoid operated, air pilot assisted. Valves include a red manual override lever for easy testing of pneumatic circuits. Coils are encapsulated for long life.

Available in standard versions, or with a port for external air supply used for switching pressures below 2.5 bar.

Order Coils Separately

Valve catalogue numbers do not include solenoid coils. Coils are supplied loose and unmounted as separate items.

AC Coil Catalogue No. 76410-02-**

DC Coil Catalogue No. 76410-00-**

** - Add the required coil voltage suffix code from the chart below to complete the coil catalogue number.

Voltage	AC	DC
12V	—	01
24V	12	02
48V	13	03
110V	14	04
230V	15	05

* External Air Pilot: valves have an auxiliary M5 (10-32) port (1/8 on 1/2 ported valves) for connecting a separate air pilot supply for the solenoid section. For use when switching air pressures below 35 PSI.

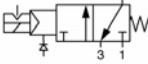

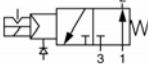

Operating pressure range is 2.5 to 10 bar. (Use valves with external pilot for switching lower pressures).

For 2/2 operation plug exhaust port 3. Through body mounting holes are 4.5mm for 1/8 and 1/4 ported valves, 6.5mm for 1/2 ported valves.

For valve specifications see appendix. See accessory section for electrical connectors. For detail dimensions contact factory.

Valves are similar to the standard 3/2 valves shown on the opposite page except have been modified with special seals and springs for vacuum applications. Valves have an external air supply port required to operate the pilot valve.
