Manually Operated Valves

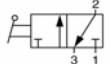

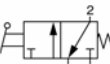

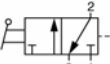

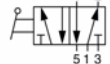

General Purpose

Kuhnke Power Valves

Lever Operator, 2 Position

Lever valves can be used to manually switch air supplies on equipment or operate cylinders and other devices. Valves can be panel mounted or fastened to a surface via body mounting holes. Handles have a contemporary black molded grip and require 15 N of force to operate. Valves are available in spring return, pneumatic return and maintained position versions.

* Pneumatic Reset Valves operate manually or are returned by a pneumatic signal (2.5 bar minimum) applied to an auxiliary 1/8 port. Operating pressure range is 0-10 bar. Actuation force @ 6 bar, is approx. 15 N.

For normally open function on 3/2 valves, reverse connect ports 1-3. For 2/2 operation, plug port 3.

Panel mounting hole size for 1/8-ported valves is 16mm diameter, for 1/4 ported valves, 22mm. Through body mounting holes are 4.5mm dia.

Typical dimensions of 5/2 1/8 ported valves are 95mm L x 35mm W x 20mm D. For 1/4 ported valves: 120mm L x 50mm W x 25mm D. For 3/2 valves subtract 16mm from L dimension. For pneumatic return valves add 25mm to L dimension. Allow space for fittings and tubing.

For valve specifications see appendix. For detail dimensions contact factory.
