Kuhnke System Logic Devices

Adjustable Pressure Switch

(Normal and Low Pressure types)

60073-80-99 Standard version 3 to 10 bar

60073-40-99 Low pressure version 0.5 to 4 bar

The Series 60 adjustable pressure switch is designed for use in detecting pressure in pneumatic systems, and provides an electrical contact output to control or indication devices.

The P/E switch pull in pressure can be adjusted throughout its operating pressure range. The dropout point is $\pm 3\%$ below the set point pressure.

An electrical micro-switch with a form C (make/break) contact is actuated by a separate diaphragm operated system. Contacts are rated 10A at 230V AC. 6mm push on connectors or an electrical plug (cat. no. 67499) can be used to complete electrical connections.

Other versions of the adjustable P/E switch are available for specific applications. They include electrical contacts rated at 100mA (catalogue suffix – **01**) and contacts rated at 6 Amps. (catalogue suffix – **60**).
